VAULT**

DVAULT Tokens are not intended to constitute securities in any jurisdiction. This Whitepaper does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction.

This Whitepaper does not constitute or form part of any opinion on any advice to purchase or sell DVAULT tokens, nor shall it or any part of it form the basis of, or be relied upon in connection with, any contract or investment decision.

No person is bound to enter into any contract or binding legal commitment in relation to the sale and purchase of the DVAULT tokens and no payment is to be accepted on the basis of this Whitepaper.

No regulatory authority has examined or approved of any of the information set out in this Whitepaper. No such action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this Whitepaper does not imply that the applicable laws, regulatory requirements or rules have been complied with.

DISCLAIMER OF LIABILITY

To the maximum extent permitted by the applicable laws, regulations and rules, DigitalVault and or its affiliates and PreSale partners shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you.

NO REPRESENTATION AND WARRANTIES

DigitalVault and or its affiliates and Pre Sales Partners does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in this Whitepaper

The DigitalVault Presale will raise funds to support a full launch of the DigitalVault System , its further Research & Development, plus its full commercial operations until such time that it is cash-flow positive.

DigitalVault is issuing its own DigitalVault Coins called DVault tokens, which it is offering to members of the Korean Crypto network, blockchain enthusiasts and investors who wish to be actively involved in the future of Cyber Defense of Cryptocurrency and Data , to participate in during its DVAULT token sale.

The DVAULT token is based on the decentralised Ethereum market standard smart contract ERC20 token.

Formed within the blockchain and subject to automatic execution upon the occurrence of pre-defined criteria and events and subject to certain conditions, DVAULT tokens are valid indefinitely and are the property of their respective holders.

The DigitalVault Technologies belongs to Teracon company registered in S.Korea , you can find the legal documentation on our website

DVAULTtokens will be distributed in direct proportion to the amount paid by the participants in the course of the Pre Sale in accordance with the Terms and Conditions.

Upon the Pre Sale launch, a single DVAULTtoken is valued at \$ 10 (Ten) USD .

Distribution Of Tokens

30% : Total Pre Sale distribution to the community together with the option for our Presale partners to acquire up to \$1m at the initial offering price .

15% : DigitalVault's future development funds

18% : Reserved for the founders and management of the Pre Sale

1% : Reserved for Pre Sale partner advisers

1% : Reserved for marketing campaign team

35%: IEO - Initial Exchange Offerings

15% of remaining tokens will be 'frozen' by the Pre Sale organisers for a period of 18 months to be gradually released on the Cryptocurrency markets thereby supporting DigitalVault's further development in the future .

As DigitalVault delivers its products and services to an increasing audience ultimately reaching a critical mass, this will inevitably increase the demand for DVAULT Tokens and in turn increase their value.

The DigitalVault is focused on delivering those products that support mass scale adoption as quickly and efficiently as possible and thereby simultaneously increase the value of DVAULT Coins .

'Bounty' Structure

Support is required for many marketing and expert discussion forums such as bitcointalk, the contribution of opinion leaders, banner ads and participation in selected publications that specialise in Cryptocurrency and blockchain.

The exact distribution of DVAULT tokens for the marketing campaign is managed by the Pre Sale organisers and adjusted regularly, but under no circumstances will it increase beyond 2% of the total issued DVault tokens.

Stages of DigitalVault's Tokens PreSale :

2. *MARCH 2020* : Investor relations, active development of potential Pre Sale participants, product and services presentation, building an advisory support network, data collection, blockchain community engagement.

3. *APRIL 2020* : PreSale Registration opening for interested potential token-holders with the possibility for interested parties to deposit funds prior to the start of the Pre Sale

4. *May 2020* : Presale

5. *June 2020*: Bonus token sale

6. *July 2020 to December 2020* : Full DVAULT Token Sale on Exchanges

7. *December 2020* : DigitalVault's Cyber Defense Data System - first platform release and starting the public sale of the technology to institutions, organizations, agencies, corporations, and individuals , all further stage releases in accordance with the road map which will be adapted to take account of prevailing market developments

Use of Pre Sale Funds

Full development of DigitalVault will end upon the completion of the Token's sales, nevertheless, to enable the effective launch of the DigitalVault, including marketing, PR, investor relations, preparation groundwork, technological interaction with the markets.

DigitalVault Pre Sale Tasks

During the DigitalVault PreSale , DigitalVault will educate and collate the thoughts and ideas of as wide a blockchain audience as possible. We plan to engage a wide community of leading blockchain activists to participate in an open dialogue about the development of DigitalVault as a leading Database Cyber Defense Provider and in turn enable potential and actual token-holders to have a direct impact on the business plans and actions of the DigitalVault. This is by far the most effective and lowest cost model to ensure that DigitalVault takes account of the prevailing market ideas and initiatives, even if this means taking us down paths that have not yet been considered.

A PreSale enables participants to have a direct input to the success of the company and in turn directly influence the return on funds contributed. Token purchases and redemptions can be, and often are, completed anonymously, thereby avoiding the traditional red tape connected to investor structure reporting, and removing the possible destabilising effect of individual high-profile investor sales.

DigitalVault's co-founders , early investors and senior managers will receive Royalties DVAULT Tokens equal to a maximum of 9% of the total number of implemented tokens, thereby ensuring their continued personal interest in the success of the Pre Sale and equally importantly the value of the token both during and post the token's sale.

Naturally the PreSale generates the working capital needed to achieve the DigitalVault business plan, whilst removing many of the long-winded steps required in securities based capital raising. For example, classic investor relations and individual contract preparation are removed and replaced by audited smart contracts.

The value of Pre Sale participant benefits and rewards is directly tied to the success of the DigitalVault Technology . DigitalVault's income will be derived from:

- Cyber Security Products and services offered by the proprietary software powering the *DigitalVault technology* that is actually the most secure way to store cryptocurrency and data of any type like files,documents,accounts, databases and more.

Income will be generated also from the following : license sales for using the DigitalVault Cyber Defense technologies in addition to recurring monthly subscription fees for accessing the services offered by the DigitalVault.

All monthly subscription fees for the services supplied by the DigitalVault technology , will be paid only and exclusively in DVAULT Tokens .

DVAULT Utility tokens may grow in price, because the demand for services and products will increase constantly . DVAULT is an example of utility token, that is designed to work in a financial ecosystem and product line.

DVAULT Tokens will be implemented into the DigitalVault ecosystem . The service will grow, so the trading volume of DVAULT Tokens, and consequently the price, will increase permanently .

The DVAULT utility token can be defined “to represent future access to the DigitalVault’s Technologies products and services.

20 % of the DigitalVault funds reserves will be used to repurchase DVAULT tokens to provide additional liquidity to people who want to cash out. The DigitalVault’s priority is to provide the token holders with real , steady raising value and full liquidity , for each token they hold.

Limited offer

DigitalVault Coins (DVAULT) tokens will be issued during the PreSale Stage. This is coded in the DVAULT Smart Contract, therefore it is 100% guaranteed by decentralized blockchain protocol. There will be no tokens issued after the IEO (Initial Exchange Offering) .

Total Amount of DVAULT that will be issued 8,000,000 , on a lifetime basis

Constant demand

All DigitalVault solutions require DVAULT tokens for usage and the amount of tokens in circulation will constantly decrease. The DVAULT token is the

fuel for the DigitalVault transaction processing. With every transaction, or service within the DigitalVault eco-system , DVAULT Tokens will be needed.

Introduction to the DigitalVault PreSale

We are for the long run , we are going to revolutionize the cyber security field , for the next decades .

Most cryptos on exchanges are currently priced at below their initial coin offering price and part of them has been erased from the trading . *This will never happen with the DVAULT Coins .*

The DigitalVault Coins will be used for paying cyber defense services within the DigitalVault system , and the DVAULT Coins holders will experience raising token prices on a permanent basis because of the limited supply of the tokens and an increasing demand in DigitalVault cyber security services.

Later on , we will explain to you exactly how the DVAULT coin will be used , when and why its price will raise .

We are here to stay forever and those are not empty promises , investing in the DigitalVault is for the long term investors . The DigitalVault will be the leading Cryptocurrency Custody and Data Storage Solution in the next years .
